Dear [REDACTED]

Adlestrop Bridge ETRO – Weight restriction

Thank you for your email dated 26 July 2019

The Council remains concerned about the impact of the proposed weight restriction on the Adlestrop Bridge, especially as the Chipping Norton element of the Oxfordshire Local Plan section 9.4.11 makes specific reference to traffic going to Evesham as well as heading south.

At our meeting with GCC Highway Officers on 24 July it was mentioned that you might have access to the relevant information from Oxfordshire. Could this information be modelled in advance of the surveys you propose both pre and post the introduction of the proposed experimental weight restriction on the bridge? If you are in a position to model using the information you already have relating to traffic flow through Moreton we would very willing to come to the office and understand the outcome from your modelling.

Councillors feel unable to support the ETRO proposal without understanding the potential impact for Moreton particularly as both our mini roundabouts will shortly be deemed to be at capacity. We remain very concerned but are willing to discuss this matter further.

Yours sincerely.

Cllr. Eileen Viviani (Chair)
